Welcome Messages

Welcome to the 2026 Newfoundland and Labrador Oral Health Convention. This year's convention will be a return to our normal size after a very successful 2025 National Oral Health Convention. However, this does not mean we have less to offer. We have arranged exceptional world class speakers that will appeal to all the members of the oral health care team. As we have always done, we have included a strong social program. We feel that fun during the convention is as important as learning. The exhibition hall will have all the new things being offered in dentistry. Finally, our Wellness program will be enhanced this year with the addition of lectures during our regular CE slots. Please make time plans to attend the convention you won't be disappointed.

Dr. Craig Smith,
President
NLDA

The Newfoundland and Labrador Dental Assistants Association Executive Committee would love to welcome all of the dental professionals to the 2026 Oral Health Convention! As usual, so many great speakers and so many great chances to get continuing education points. My executive and I hope to see you at the social events, dinner and trade show floor. Enjoy!

Amanda Hart,
President
NLDA

Welcome Messages

On behalf of the Newfoundland and Labrador Dental Hygienists' Association Executive, we are delighted to extend our sincere welcome to everyone attending the 2026 Provincial Oral Health Convention.

There is something special about gathering together as oral health professionals in Newfoundland and Labrador. Our province is built on resilience and a deep sense of community. These values define who we are and can be reflected in the way we care for our patients as well as support one another within our profession.

We are proud to come together alongside other dental hygienist, dentists, dental assistants, and members of the oral health team from across our province and beyond. This convention represents more than continuing education; it represents shared progress, advocacy, and the collective efforts of our entire oral health community.

Our profession continues to evolve in exciting and meaningful ways. As dental hygienists, we are continually expanding our horizons, impact in prevention, education, and access to care.

As an Executive team, we are deeply committed to progress. Behind the scenes, we are advancing initiatives that support professional development, advocacy, and the long-term sustainability of dental hygiene throughout Newfoundland and Labrador. We believe that strong leadership and a diverse community go hand in hand. Teamwork is how we continue to move forward and grow.

We hope this convention leaves you feeling inspired and connected. Take this opportunity to learn, network, share ideas, and celebrate the important work being done in clinics and communities throughout our province.

Thank you for being here. Thank you for your dedication to oral health. And most importantly thank you for being part of a profession that continues to grow stronger!

Natasha Pelley,
President
NLDHA

— Planning Committee

Dr. Craig Smith (Chair)
Dr. Daniel Fingrut
Lesley Patey, NLDA

Patricia Penton, RDH
Heather Temple, RDA
Kerry Griffiths, OS
Krystal Holwell, NLDA

Welcome from the 2026 Oral Health Convention Committee

Last year we showed the Nation how great our members are, this year we are having our members do the lectures, and speak on a topic of their interest. The Oral Health Convention Committee focused our effort to have as many local dentists, and speakers as we could. There are a few speakers who are from the "mainland" as we wanted to make sure as many topic areas are covered as possible.

We hope you enjoy our "homegrown" CE speakers. The NLDA and OHC Committee are always looking to introduce as many ways to be active within the association as possible. If you have an idea for a course, want to be a speaker, or have an idea we haven't thought of yet, let us know!

Make sure to take a look around the tradeshow floor, chat with companies, it's a perfect time to ask any questions you have lingering in the back of your mind but never have enough time to send off an email.

Dr. Craig Smith
Chair

General Information

Registration

Convention Registration

To register for the lectures, AGM, social events, and wellness events, visit :

<https://nlda.5by5.ca/2026>

All changes and payments can be done through your account.

Delegate Registration - Hours of Operation

For badge pick-up or registration visit the Registration Desk at the Delta during the following hours of operation.

- Thursday, June 4, 8:00 a.m. to 4:30 p.m.
- Friday, June 5, 8:00 a.m. to 4:30 p.m.
- Saturday, June 6, 8:00 a.m. to 4:30 p.m.

Registration Contact Information

If you have any questions regarding your registration, please contact:

- Phone Number: 1-833-628-0508
- Email: nlda@5by5.ca (registration and technical support)
- info@nlda.net (general inquiries)

Convention Badges

Scanning

For all attendees that require session scans for CE attendance verification, please ensure that you are scanned-in at each session.

Lost Badge and Ticket Replacement

Replacement for lost badges is \$20.00. Attendees are required to show proof-of-purchase and picture identification to receive a badge replacement. For badge replacement please go to the Registration Desk, at the Delta Hotel.

Attendee Cancellation/Refunds

Attendee Cancellation/Refunds Policy

The Conference will issue a 100% refund up until April 15, 2026. Starting May 4, 2026, refunds will be 50%. Starting May 18, 2026, registration costs will be non-refundable.

DENTAL PROFESSIONALS ARE TRUSTED VOICES IN TOBACCO/NICOTINE CESSATION TREATMENT.

NL Smokers' Helpline smoking/vaping cessation programs

operated by NL Lung
funded by the provincial and federal governments

QUIT-SMOKING OR QUIT-VAPING PROGRAMS

Your patients receive:

- One-on-one quit coaching from trained cessation specialists
- A personalized quit plan tailored to their readiness to quit
- Ongoing support by phone, text, or online
- Practical strategies for managing cravings and triggers
- Free self-help tools and resources to support their quit journey

A brief intervention that can make a difference:

- ✓ Ask about tobacco/vape use
- ✓ Advise patients to quit
- ✓ Refer them to the NL Smokers' Helpline

With patient consent, submit their contact information through a Referral and the NL Smokers' Helpline will proactively call them to discuss available programs.

Integrate quit support into your practice.

CPR

Alyssa Broomfield
8:00 a.m. - 12:00 p.m.

These CPR courses are a recertification. You must have or had a valid CPR certificate in the last six months.

Alyssa Broomfield (She/Her) is an experienced CPR and First Aid Instructor with nearly 15 years of teaching expertise. She is passionate about saving lives and empowering others with lifesaving skills. Alyssa is dedicated to inclusive education, having taught students of all ages and walks of life. Her dedication ensures that every student walks away feeling prepared, confident, and ready to handle any emergency with calm professionalism. Outside of Aquatics, Alyssa is a full-time student at the College of the North Atlantic.

Speakers and Topics - Thursday, June 4

Tips and Tricks for IPAC Success

Dr. Christopher Swayze
9:00 a.m. - 12:00 p.m.

This course is designed to give you straightforward tips and tricks on IPAC best practices. The focus of this course is to provide up-to-date information on best practices in infection prevention and control based on provincial and national standards, instruction on the practical application of those practices in dental offices, and simple ways to implement these practices. The course also reviews common issues found in dental offices in regulatory and public health unit complaints/investigations and how to avoid them.

Learning Objectives:

1. Review recent changes to provincial and national IPAC standards and what might come next.
 2. Understand the steps involved in IPAC, including disinfection, sterilization, and IPAC documentation.
 3. Learn simple ways to avoid common pitfalls and implement IPAC best practices into the dental practice.
-

Dr. Chris Swayze graduated from the Faculty of Dentistry, University of Western Ontario, in 1993; obtained his MBA for Science and Technology from Queen's University in 2000; and in 2012 received the Osgoode Certificate in Health Law from Osgoode Hall Law School. He joined the staff of the Royal College of Dental Surgeons of Ontario (RCDSO), in 2002, where he worked for more than 16 years. While at the RCDSO, Dr. Swayze held numerous positions, including as Manager, Reports, in the Professional Conduct and Regulatory Affairs Department, the RCDSO's Inquires Complaints and Reports process, Quality Assurance, ADR/mediation, discipline, remediation, and on working groups developing guidelines and standards of practice. In 2019, Dr. Swayze left the RCDSO and joined the University of Toronto, Faculty of Dentistry, as Director, Continuing Dental Education. He is a member of the Dean's Senior Leadership Team, on several CSA Group IPAC Standards Committees, including the national standard CAN/CSA Z314 Technical Committee - Medical Device Reprocessing, an examiner and invigilator for the National Dental Examining Board of Canada (NDEB), a member of the International Association for Health Professions Education (AMEE) CPD Committee, and a member of IPAC Canada. He is also a Fellow of The Pierre Fauchard Academy, The American College of Dentists, and The International College of Dentists.

Speakers and Topics - Thursday, June 4

Therapeutic and Cosmetic Botulinum Toxin in Oral Health: Proper Use, Efficacy, and Clinical Pitfalls

Dr. Firoozeh Samim and Dr. Elham Emami
9:00 a.m. - 12:00 p.m.

Dr. Elham Emami

Dr. Firoozeh Samim

Therapeutic and Cosmetic Botulinum Toxin in Oral Health: Proper Use, Efficacy, and Clinical Pitfalls Learning Objectives

By the end of this session, participants will be able to:

1. Identify appropriate therapeutic and cosmetic indications for botulinum toxin use in oral health practice.
2. Evaluate efficacy and safety considerations, including dosing principles, anatomical accuracy, and patient selection.
3. Recognize common pitfalls and complications associated with botulinum toxin use and apply strategies to prevent adverse outcomes.

Session Summary

Botulinum toxin has become an increasingly utilized adjunct in oral health care for both therapeutic and cosmetic purposes. This session will review evidence-based indications, mechanisms of action, and expected clinical outcomes of botulinum toxin use in dentistry and oral medicine. Emphasis will be placed on proper patient selection, anatomical considerations, realistic outcome expectations, and risk mitigation. Common challenges and complications encountered in clinical practice will be discussed, providing attendees with practical guidance for safe and effective use.

Dr. Elham Emami is a clinician–scientist, Full Professor, and Dean of the Faculty of Dental Medicine and Oral Health Sciences at McGill University. She has a MSc in Prosthodontics and a PhD in Biomedical Science and postdoctoral fellowships in Dental Public Health and Cancer Epidemiology. Dr. Emami has held numerous leadership roles, including service on the CIHR Institute of Musculoskeletal Health and Arthritis Advisory Board and as past president of the IADR e-Oral Health Network. She is the Dentistry Discipline Director on the Board of the Canadian Academy of Health Sciences (CAHS). She also serves as a research expert for the Quebec government’s Commissaire à la santé et au bien-être (2025–2028) and has served on the boards of several educational and non-profit organizations. Dr. Emami is the recipient of numerous distinctions, including CIHR Clinician-Scientist Awards I and II. She is a Fellow of the Canadian Academy of Health Sciences, the Académie dentaire du Québec, the American College of Dentists, and the Pierre Fauchard Academy. In 2024, she also received the Prix Mérite from the Conseil interprofessionnel du Québec, awarded by the Ordre des dentistes du Québec.

Speakers and Topics - Thursday, June 4

People First - Build a Team that Lets You Thrive, Dental Marketing in 2026 - What Works Now (Traditional vs Digital, and the Truth in the Middle) and Operations & Transitions - Run it Better Today, Position it Better for Tomorrow

Mr. Alex Zlatin

Alex Zlatin and Savannah Koran
9:00 a.m. - 12:00 p.m.

People First — Build a Team That Lets You Thrive

Brief description: Most practices don't have an "HR problem" - they have a system problem. This segment covers how to consistently attract the right candidates, run an interview process that actually predicts performance, onboard in a way that reduces churn, and create clear expectations so your culture isn't dependent on a few "hero" team members.

Attendees will leave with practical frameworks for hiring, performance management, accountability, and retention - so the clinic can scale without burning out the owner or the team.

What you'll walk away with: a simple hiring funnel, interview scorecard approach, onboarding structure, and a "team operating system" mindset.

Ms. Savannah Koran

Dental Marketing in 2026 — What Works Now (Traditional vs Digital, and the Truth in the Middle)

Brief description: Marketing isn't about "doing more", it's about doing what converts and what builds long-term trust in your community. This segment breaks down what's actually working for dental clinics in 2026, including the evolving role of Google, reviews, local search, paid ads, social media, referrals, and community-based traditional marketing. We'll compare traditional vs digital through the lens of ROI, patient quality, team capacity, and chair-time profitability - plus how to avoid wasting money on strategies that look busy but don't build a healthier schedule.

What you'll walk away with: a practical marketing scorecard, a "stop/start/continue" list for common tactics, and a simple plan to align marketing with production goals and staffing capacity.

Speakers and Topics - Thursday, June 4

People First - Build a Team that Lets You Thrive, Dental Marketing in 2026 - What Works Now (Traditional vs Digital, and the Truth in the Middle) and Operations & Transitions - Run it Better Today, Position it Better for Tomorrow

Mr. Alex Zlatin

Alex Zlatin and Savannah Koran
9:00 a.m. - 12:00 p.m.

Operations & Transitions — Run It Better Today, Position It Better for Tomorrow

Brief description: Whether you plan to sell in 2 years or 12, the same truth applies: strong operations create both better lifestyle and stronger valuation. This segment demystifies what drives clinic value (beyond revenue), how operational maturity impacts buyer interest, and when it makes sense to sell vs hold. We'll cover the operational levers that increase profitability and reduce risk—like metrics, scheduling systems, capacity management, hygiene optimization, leadership structure, and documentation - so owners can improve the clinic now while building future optionality.

What you'll walk away with: a “value drivers” checklist, the concept of transition readiness, and an operational improvement roadmap that's realistic for busy clinics.

Ms. Savannah Koran

As CEO, **Alex Zlatin** helps struggling dental professionals take control of their practices and reach the next level of success with responsible leadership strategies. Leveraging over 15 years of management and consulting experience, he empowers organizations to become more productive and profitable based on the belief that successful businesses establish a genuine connection with employees, patients, and vendors. Alex volunteers his time and expertise with various professional organizations, has launched the Dental Office Managers Association of Canada and is the author of Responsible Dental Ownership: Balancing ethics and business through purpose available on Amazon.

Savannah began her dental journey over 20 years ago, bringing experience across both clinical and operational roles and a strong understanding of what it takes to build high-performing dental teams. She previously served as Director of Operations for Mint Ops' Recruitment division, supporting clinics through the hiring process and helping build the structure behind successful placements. Today, Savannah continues to support dental practices through operational consulting, helping clinics improve performance, increase efficiency, and build long-term practice value. In her role as Chief of Staff, she also leads Mint Ops' HR function, improving alignment across teams and creating structure and consistency through clear internal processes, expectations, and documentation.

Speakers and Topics - Thursday, June 4

From Overwhelming to Optimized: Combining Strength, Aesthetics and Hygiene for implant restorative solutions and providing your patients with better sleep.

Mr. Andreas Klie
9:00 a.m. - 12:00 p.m.

With the ever growing options for Implant restorative solutions and workflows, finding the right solutions for your patients has become a challenge in itself for many clinicians. Clinicians are constantly looking for solutions which need to address some of the most important criteria when planning an Implant Bar restoration, Strength, Aesthetics and Hygiene and of course deliver a solution for their patients which meets the patients' expectations. Treating your breathing disorder patients with state of the art Nylon appliances.

Learning Objectives:

- Discuss the demanding challenges of optimal implant retained dental solutions.
 - Look at solutions available for some of those challenging cases
 - Review implant bar solutions which cover function, aesthetics, and hygiene
 - Discuss how the introduction of CAD/CAM has impacted restorative options
 - Discuss the various workflows available for these challenging cases
 - Providing your patients with the optimal Night Guards.
 - Providing your breathing disorder patients with the optimal Mandibular advancement devices
-

Andreas is a Registered Dental Technologist with 40 years of experience in the dental field. Andreas graduated as an RDT in South Africa in 1986. He founded La Lucia Dental Laboratory in 1991 and operated it until he came to Canada in 2001. In 2005, he became an RDT in Ontario. Andreas plays a major role in Panthera Dental's strategy to incorporate more technical guides and articles into its portfolio. His experience as a dental technologist, combined with his field experience, allows him to offer customers precise and detailed solutions on a more technical level.

Speakers and Topics - Thursday, June 4

WHEN, WHERE and WHY? The Dental Hygienists Guide to Combining Hand Scaling, Air Polishing and Ultrasonic Procedures

Ms. Dani Botbyl
1:00 - 4:00 p.m.

Dental hygienists dedicated to clinical practice spend the majority of patient treatment time battling biofilm, calculus, and stain. While ultrasonic technology, subgingival air polishing, and hand instruments each have their claims for effectively disrupting and removing hard and soft deposits, the key question remains: when, where and why should each method be used? This session separates science from clever

marketing and explores advantages and limitations of each procedure, inspiring the critical thinking needed to develop individualized debridement strategies for each patient's unique needs. The session will feature live audience polling and clinical demonstrations to reinforce key takeaways and support practical application.

- Examine current research on ultrasonics, supra/subgingival air polishing, and hand instrumentation to determine their respective roles in preventing and treating periodontal disease.
 - Apply evidence-based decision making to select and sequence debridement instruments, magnetostrictive and piezoelectric technologies, and powder formulations to achieve patient-specific clinical results and maximize comfort.
 - Design or enhance biofilm therapy protocols that strengthen overall treatment efficiency, streamline appointment flow and promote professional growth and satisfaction within the dental hygiene team.
-

Dani Botbyl is an educator, author, and award-winning researcher who has been a trailblazer for the advancement of ultrasonic technology in dental hygiene practice and education in North America and abroad. The culmination of her knowledge and research has produced multiple publications in industry and peer-reviewed journals and textbooks. Dani has presented hundreds of courses to students, faculty and practicing clinicians nationally and internationally. Her passion for enhancing the expertise of dental hygienists creates learning experiences that are not to be missed!

Speakers and Topics - Thursday, June 4

Navigating Insurance Company Audits, Complaints, and Investigations

Dr. Chris Swayze
1:00 - 4:00 p.m.

Dental insurance audits are becoming increasingly common across Canada, and the stakes for dental professionals have never been higher. This practical, compliance-focused course equips dentists and dental team members with the knowledge needed to respond to insurance company inquiries, navigate insurance audits, respond effectively to complaints or investigations, and most importantly, prevent issues before they arise. The course outlines the audit process and highlights what

insurers look for when reviewing claims, what triggers an audit, common pitfalls leading to an audit, and the possible outcomes of an audit. Participants will learn strategies to ensure their records support the treatment provided, minimize administrative risk, and promote smooth interactions with insurance carriers.

Learning Objectives:

- Understand the audit process, triggers, and how to respond to an audit.
- Ensure clinical records and documentation clearly supports the treatment provided and procedure codes submitted to insurers.
- Learn how to reduce administrative inconsistencies and errors in claims submission.
- Minimize the risk of an audit and negative outcome.

Dr. Chris Swayze graduated from the Faculty of Dentistry, University of Western Ontario, in 1993; obtained his MBA for Science and Technology from Queen's University in 2000; and in 2012 received the Osgoode Certificate in Health Law from Osgoode Hall Law School. He joined the staff of the Royal College of Dental Surgeons of Ontario (RCDSO), in 2002, where he worked for more than 16 years. While at the RCDSO, Dr. Swayze held numerous positions, including as Manager, Reports, in the Professional Conduct and Regulatory Affairs Department, the RCDSO's Inquires Complaints and Reports process, Quality Assurance, ADR/mediation, discipline, remediation, and on working groups developing guidelines and standards of practice. Medication-Related Oral Conditions: Recognition, Prevention, and Management

Dr. Elham Emami

Dr. Firoozeh Samim and Dr. Elham Emam
1:00 - 4:00 p.m.

Medication-Related Oral Conditions: Recognition, Prevention, and Management (Including, but not limited to, medication-related osteonecrosis of the jaw, xerostomia, and stomatitis)

Learning Objectives

By the end of this session, participants will be able to:

1. Recognize oral manifestations associated with commonly prescribed medications, including but not limited to medication-related osteonecrosis of the jaw, xerostomia, and oral mucosal conditions.
2. Assess patient risk factors and medication histories to improve early identification and prevention of medication-related oral complications.
3. Implement evidence-based management strategies and determine appropriate referral pathways when necessary.

Session Summary

Medications prescribed for systemic conditions frequently have significant oral health implications that may impact

diagnosis, treatment planning, and patient outcomes. This session will provide a comprehensive overview of medication-related oral conditions, with a focus on clinical recognition, prevention, and management. Key conditions such as medication-related osteonecrosis of the jaw, xerostomia, and inflammatory or ulcerative mucosal disorders will be reviewed. Through clinical examples and practical guidance, participants will gain tools to better manage medically complex patients and reduce medication-associated oral morbidity

Dr. Firoozeh Samim

Dr. Firoozeh Samim is an Assistant Dean of Student Affairs and Equity, Diversity, and Inclusion, and Director of the Graduate Diploma in Oral Medicine at the Faculty of Dental Medicine and Oral Health Sciences, McGill University. She is Canadian- and American-board certified in Oral Medicine and Oral and Maxillofacial Pathology and has several years of combined academic and clinical experience. Dr. Samim's clinical practice focuses on temporomandibular disorders (TMD), orofacial pain, oral medicine, oral precancerous and cancerous lesions and oral pathology. She provides specialized care to patients across Quebec, and Newfoundland and Labrador, with an emphasis on complex diagnostic and management cases requiring interdisciplinary expertise. In her academic role, Dr. Samim is deeply committed to education, mentorship, and curriculum development. She is actively involved in undergraduate and graduate teaching, program leadership, and faculty development. She is a recipient of the Howard S. Katz Award for Excellence in teaching and the Ralph Silverstone Teaching Award, recognizing her outstanding contributions to education and learner engagement.

ARE YOU A GROWING BUSINESS AND NEED TO EXPAND?

We can help.

Your trusted partner for clinical and commercial construction.

- ✓ EXPERIENCED.
- ✓ RELIABLE.
- ✓ BUILT FOR YOU.

SPECIALIZING IN:

-  DENTAL CLINICS
-  MEDICAL OFFICES
-  HEALTHCARE FACILITIES
-  COMMERCIAL RENOVATIONS & EXPANSIONS
-  NEW BUILDING CONSTRUCTION

We understand that your practice is busy. We make the building process smooth, efficient and stress-free—so you can stay focused on your patients and your business.

COMPLETE DESIGN-BUILD SOLUTIONS

From concept to completion, we handle everything.

SPACE PLANNING & DESIGN

ENGINEERING & DRAWINGS

Yoga

Meghan Samson
6:30 a.m. - 7:30 a.m.

Join a morning yoga class is a refreshing way to start the day with energy and focus. The gentle stretches and mindful breathing help wake up the body, improve flexibility, and clear the mind before daily responsibilities begin. Practicing alongside others also creates a sense of community and motivation, making it easier to stay consistent.

Meghan Samson is the Operator of Nova Yoga studio in the heart of downtown St. John's. Trained in Vinyasa Flow, Yin, Core Strength & Restorative Yoga, she truly believes that no matter your age, size, or fitness level: there is a style of yoga to serve you and your needs.

A student of yoga for 15 years and a teacher for 10, Meghan is passionate about helping people reconnect to themselves through the practice. Her teaching style is playful and compassionate, focused in fluid movement, deep breathing, and nervous system regulation. She loves supporting students in building strength, flexibility and resilience, so they are able to move through life with a little more ease.

Meghan says "I don't take myself too seriously, and I hope you won't either- there's always room to laugh in my class!"
When she's not on the mat, you can find her wandering the woods or visiting the ocean with her dogs, spending time with family, and chasing sunshine whenever she can.

CPR

Alyssa Broomfield
12:30 - 4:30 p.m.

These CPR courses are a recertification. You must have or had a valid CPR certificate in the last six months.

Alyssa Broomfield (She/Her) is an experienced CPR and First Aid Instructor with nearly 15 years of teaching expertise. She is passionate about saving lives and empowering others with lifesaving skills. Alyssa is dedicated to inclusive education, having taught students of all ages and walks of life. Her dedication ensures that every student walks away feeling prepared, confident, and ready to handle any emergency with calm professionalism. Outside of Aquatics, Alyssa is a full-time student at the College of the North Atlantic.

Behaviour Management in Pediatric Dentistry: Guidelines and Clinical Lessons

Dr. Geoff Smith
1:00 - 4:00 p.m.

The course will review the guidelines for Behaviour Management from the American Academy of Pediatric Dentistry as well as lessons learned from my Pediatric Dental experiences

Dr. Geoff Smith, Graduated McGill University School of Dentistry 1977, Graduated Case Western Reserve University Pediatric Dentistry Residency 1986, Chief of Dentistry, Janeway Child Health Centre, 1986 -2014 Private practice 2014 to present, NLDA President for 2 terms 16 years on various Scientific Committees for the Canadian Dental Association

Speakers and Topics - Friday, June 5

The interrelationship between periodontal disease and systemic diseases

Dr. Tony Crivello
1:00 - 4:00 p.m.

This presentation will focus on the bidirectional relationship between periodontal disease and systemic diseases and will focus on how the oral bacterial biofilm and chronic oral inflammation impact systemic inflammatory conditions like diabetes and cardiovascular disease. There will be focus on the pathogenesis of periodontitis, risk factors and the role of interventions in improving oral health and systemic health.

Dr. Crivello received his dental degree from McGill University. He received his certificate in periodontics and intravenous conscious sedation as well as a Master of Science degree from the University of North Carolina at Chapel Hill. He is the recipient of numerous clinical and academic recognitions including the American Academy of Periodontology's Balint Orban Prize honouring research conducted while in graduate school. Dr. Crivello is a Fellow in the Royal College of Dentists of Canada. He is a Board Certified Periodontist and a Diplomate of the American Board of Periodontology. He lectures nationally and internationally on periodontics, dental implants and cosmetic periodontal therapy. Dr. Crivello maintains a full-time private practice limited to periodontics and implant dentistry in St. John's, Newfoundland.

Speakers and Topics - Friday, June 5

The odd ones out: managing impacted canines, laterals, peg and tooth anomalies

Dr. Haji and Dr. Molla
1:00 - 4:00 p.m.

1. Overview & Clinical Relevance

- Prevalence and impact of dental anomalies
- Why early identification matters

2. Impacted Canines

- Etiology and risk factors
- Early clinical and radiographic signs
- Interceptive vs definitive treatment
- Surgical exposure concepts and orthodontic traction
- Common complications and prognosis

3. Peg Laterals

- Diagnosis and treatment planning
- Orthodontic space management options
- Restorative considerations and sequencing
- Adolescent vs adult treatment differences

4. Tooth Number, Size, and Shape Anomalies

- Hypodontia, supernumerary teeth, and microdontia
- Effects on eruption and occlusion
- Management principles and timing

5. Case-Based Integration

- Real-world cases combining multiple anomalies
- Treatment decisions and outcomes
- Practical lessons for daily practice

6. Referral Timing & Take-Home Points

- When to monitor vs refer
- Key red flags for early orthodontic referral
- Improving outcomes through collaboration

Learning Objectives Participants will be able to:

- Recognize impacted canines, peg laterals, and common tooth anomalies
- Understand appropriate timing for intervention and referral
- Coordinate orthodontic and restorative care effectively

Dr. Hussein Haji and Dr. Nafisa Molla are orthodontic specialists practicing in Halifax, Nova Scotia, with visiting specialist services in Happy Valley–Goose Bay, Newfoundland and Labrador. Both earned their Doctor of Dental Surgery (DDS) degrees from the University of Toronto. Dr. Haji completed his orthodontic specialty training and Master of Science at the University of British Columbia, and Dr. Nafisa completed hers at the University of Alberta. Both are certified specialists in orthodontics by the Royal College of Dentists of Canada (RCDC) and are Diplomates of the American Board of Orthodontics (ABO). Their clinical practices focus on comprehensive orthodontic treatment for children, adolescents, and adults, including fixed appliances, clear aligner therapy, and digitally driven treatment planning. Their approach is grounded in interdisciplinary care and collaborative communication across the dental profession.

Dental Ergonomics: Avoiding Work Related Injuries

Corey Pritchett
9:00 a.m. - 12:00 p.m.

Outline:

- Introduction
 - What's Causing Your pain?
 - What is good posture?
 - The Importance of Posture and Positioning.
 - Why Dentistry is such a Pain in the Neck?
 - Don't let Plaque Be a Pain in the Back.
 - Let's Practice Optimal Sitting and Neck/Back Awareness.
 - Shoulder Pain.
 - Getting the Upper "Hand" on Pain.
 - Do Dental Professionals Require Specific Exercise?
-

Corey completed a Bachelor of Secondary Education, a Bachelor of Physical Education and a Masters of Physical Education from Memorial University prior to completing a Bachelor of Science Physiotherapy at Dalhousie University in 2002. He began his career in Springdale in 2002 working at the Green Bay Health Sciences Centre in a primarily outpatient orthopaedic setting. In addition, Corey has worked in outpatient orthopaedics at the Janeway and Health Sciences Centre in St. John's. He has worked at Nova Physiotherapy for 15 years and is currently one of three co-owners.

Most of his post graduate work has been in the field of orthopaedics, manual/manipulative therapy techniques, acupuncture, Mackenzie Parts A and B, mobilization and neuro-orthopaedics, and muscle and movement impairment syndromes. In addition, courses in running, bike fit design, golf, and injury prevention.

Corey has been extensively involved in competitive sports all his life and played university volleyball and Canada Games Track and Field. His interest and participation in sports has led to a keen interest in rehabilitating sports related injuries. Leisurely, Corey partakes in running, weight training, golf, snowmobiling/boating, and most outdoor activities.

Mastering Molar Endodontics for the General Dentist. Didactic

Dr. Rodrigo Cunha
9:00 a.m. - 12:00 p.m.

Endodontic treatment in Maxillary and Mandibular Molars can often be difficult and frustrating. Incorporating modern technology into your daily practice will provide you with the tools and confidence required to perform an efficient and effective endodontic treatment. However, a thorough understanding of the internal and external anatomy is paramount for a positive and predictable outcome.

This evidence-based course will focus on essential technologies and clinical protocols for the successful treatment of Maxillary and Mandibular Molars. Topics to be covered include: 1. The importance of the internal and external anatomy 2. The importance of magnification and illumination to enhance visibility and increase probability of locating extra canals without removing excessive tooth structure. 2. The benefit of incorporating three-dimensional imaging into your practice for enhanced visualization of difficult anatomy and dealing with challenging diagnoses will also be discussed. 3. Electric motors driving rotary and reciprocating files, which are indispensable for faster and safer shaping of the canals. 4. The role of irrigants and irrigation has changed within the past few years as it has evolved from an adjunct solution to an important tool for disinfection. 5. Different devices and materials will be discussed for filling the root canal system “blocking” the portal of entrance to bacteria which is paramount to maintain the asepsis achieved during disinfection.

Learning Objectives:

After completing the course, the students will be able to:

1. Understand the anatomical complexities of molar teeth and their impact on endodontic treatment.
2. Improve efficiency in access cavity preparation and canal location.
3. Learn effective shaping and cleaning protocols to minimize procedural errors and maximize disinfection
4. Master obturation techniques for predictable sealing.
5. Manage common complications encountered in molar endodontics.

Dr. Rodrigo Sanches Cunha completed his Undergraduate Dental Degree in 1994, which he obtained from the Catholic University of Campinas in Sao Paulo - Brazil. His post-graduate studies include a Specialty degree in Endodontics obtained in 1997 from the State University of Campinas (UNICAMP); in 2002, a M.Sc. degree in Clinical Dentistry (Endodontics), and in 2006, a Ph.D. degree in Dental Sciences both of which he received from Sao Leopoldo Mandic Centre for Dental Research. Dr. Cunha was an Associate Professor at the Catholic University of Campinas from 2001 until 2011. On September 9, 2011, Dr. Cunha moved to Winnipeg to work as a Full-time Professor and Division Head (Endodontics) at the College of Dentistry, Faculty of Health Sciences at the University of Manitoba. Dr. Cunha became Fellow of the Royal College of Dentists of Canada (Endodontics) in 2013 and, in 2016, decided to work in Private Practice full-time. Dr. Cunha is the Co-founder of Prairie Endodontics in 2018. Dr. Cunha has been a guest speaker at more than 200 events worldwide. He has published more than 100 papers and abstracts in several peer reviewed journals. In addition, Dr. Cunha has published six book chapters and has extensive clinical experience obtained working in Private Practice limited to Endodontics since 1995. Dr. Rodrigo Cunha is the Past President of the Canadian Academy of Endodontics (CAE).

Speakers and Topics - Saturday, June 6

Complications in Orthodontics

Dr. Codey Pilgrim
9:00 a.m. - 12:00 p.m.

Like all areas of dentistry, managing complications effectively is critical when providing orthodontic treatment. Those skills will allow you to keep your patient safe and finish on time.

Unpredictability is predictable! This lecture will outline various complications, hiccups, and headaches you may experience while providing orthodontic treatment with brackets, aligners, or other fixed appliances. We'll review warning signs, the usual (and some unusual) struggles, and management techniques when struggles inevitably arise.

Dr. Pilgrim is a board-certified orthodontist and Fellow of the Royal College of Dentists of Canada. He earned a Bachelor of Science in Biology from Memorial University of Newfoundland and completed his Doctor of Dental Surgery (DDS) at Dalhousie University in Halifax, Nova Scotia. After graduation, he pursued a general practice residency in pediatric dentistry at The Hospital for Sick Children through the University of Toronto. From there he moved on to the University of Alberta to complete a Master of Science in Medical Sciences, Orthodontics, publishing two papers on patient-provider communication and shared decision-making. He is thrilled to be back in his home province of Newfoundland and Labrador as the owner of Anchor Orthodontics.

As a volunteer, he serves on various committees with the CAO, CFAO, and RCDC including the Atlantic selection committee for Smiles 4 Canada, which helps provide orthodontic care to families in need.

Dr. Pilgrim is a proud, born-and-bred Newfoundlander who calls St. John's home! He is very happy to be there with his wife, Beth, and his sons, Finley and Theodore. His personal interests include hockey (he's an ever-suffering Maple Leafs fan), road trips, skiing, hiking, and family time.

Speakers and Topics - Saturday, June 6

Sectional Matrix Systems Clinically Proven Solutions for Everyday Dentistry

Peter Alport
9:00 a.m. - 12:00 p.m.

Today's sectional matrix systems all have clinical challenges that can keep you from creating your best case scenario, such as: Excess flash that's difficult to finish (especially at the proximal box). Most rings fatigue over time, lose their separation force, and require re-tensioning, yet never regain their original strength. Most wedges just fill in the interproximal space, don't provide much separation force and don't always seal the matrix band tooth interface, resulting in flash. Many matrix bands do not properly wrap the tooth, making it difficult to restore teeth when part or all of a cusp is missing.

Learning Objectives:

- Understand the importance of creating tight contacts to ensure success with Class II restorations.
 - Learn how to significantly reduce excess flash utilizing a unique matrix system.
 - Understand the differences with competitor products in relation to reducing treatment time and increasing practice profitability.
 - Learn about a revolutionary dual-cured resin that allows for single increment placement and self-cures in 55 seconds from time of placement.
 - Learn about what clinician's value when selecting their restorative material for direct restoration's.
 - Learn how Evanesce Nano-Enhanced Restorative material blends in with the surrounding tooth structure to create invisible margins.
 - Learn what makes Evanesce Nano-Enhanced Restorative material ideal for any anterior or posterior restorations.
 - Learn how to polish your composite restorations to a high natural gloss like appearance that rivals porcelain in under one minute.
-

Peter Alport has been a dental education consultant for over 35 years and is dedicated to helping dental professionals improve patient care and oral health. He has travelled to over seventy (70) countries to educate Key Opinion Leaders, Dentists, Dental Faculty, Hygienists and Dental Assistants on clinically proven dental products and techniques. He is currently the International Sales Manager for Clinicians Choice Dental Products, Inc.

Speakers and Topics - Saturday, June 6

Botox (BoNT-A) & Implant Success

Dr. Warren Roberts
1:00 - 4:00 p.m.

Do you have patients who require dental implants?
Have you had patients with dental implant failures?
Bone loss? Inflammation? Infection?

Using BoNT-A prior to implant surgery can enhance hard and soft tissue grafting success and aid in successful bone regeneration. We know that in the battle between bone, tooth,

muscle, TMJ and soft tissue - muscle always wins! BoNT-A has a relaxing effect on muscles. This presentation will review the muscular impact on the periodontium, explain the impact of anxiety and depression on bone loss, and how BoNT-A can have a positive therapeutic effect on both. In addition, we will review angiogenesis and how Bonita can improve osseous integration. Selective Bonita muscle targeting will improve your implant patient success.

Course Objectives:

- to understand how relaxation of musculature using BoNT-A can enhance positive outcomes when placing implants,
- to understand how the muscles surrounding the alveolar ridges can interfere with implant integration and how BoNT-A can be used to relax them,
- to understand how BoNT-A can improve angiogenesis in graft and implant treatment

Dr. Warren Roberts, based out of Vancouver, BC is currently leading the facial injectable industry. Since 2008, he has trained over 8,000 practitioners internationally, and has treated hundreds of botulinum toxin patients. Through his commitment to delivering excellence in this field, his program content and educational model is now being adopted by various regulatory boards across Canada to establish the "Standards of Practice".

In addition, PTIFAT continues to set the standard for facial rejuvenation procedures by its pioneering development of the Roberts Facial Rejuvenation Photography series which generates a 99% case acceptance rate, the PTIFA Anatomic Landmark Template the PTIFA Injection Template (Therapeutic & Cosmetic) and the PTIFAT Injection Technique.

Speakers and Topics - Saturday, June 6

Mastering Molar Endodontics for the General Dentist. Hands-On

*Must take morning session before hands-on

Dr. Rodrigo Cunha
1:00 - 4:00 p.m.

Endodontic treatment in Maxillary and Mandibular Molars can often be difficult and frustrating. Incorporating modern technology into your daily practice will provide you with the tools and confidence required to perform an efficient and effective endodontic treatment. However, a thorough understanding of the internal and external anatomy is paramount for a positive and predictable outcome.

During the hands-on portion of the course, attendees will perform the shaping and filling protocols discussed during the didactic component. At this time, Dr. Cunha will be “over the shoulder” to provide feedback and discuss any question and/or concerns that may arise.

Learning Objectives:

After completing the course, the students will be able to:

1. Understand the anatomical complexities of molar teeth and their impact on endodontic treatment.
2. Improve efficiency in access cavity preparation and canal location.
3. Learn effective shaping and cleaning protocols to minimize procedural errors and maximize disinfection
4. Master obturation techniques for predictable sealing.
5. Manage common complications encountered in molar endodontics.

Dr. Rodrigo Sanches Cunha completed his Undergraduate Dental Degree in 1994, which he obtained from the Catholic University of Campinas in Sao Paulo - Brazil. His post-graduate studies include a Specialty degree in Endodontics obtained in 1997 from the State University of Campinas (UNICAMP); in 2002, a M.Sc. degree in Clinical Dentistry (Endodontics), and in 2006, a Ph.D. degree in Dental Sciences both of which he received from Sao Leopoldo Mandic Centre for Dental Research. Dr. Cunha was an Associate Professor at the Catholic University of Campinas from 2001 until 2011. On September 9, 2011, Dr. Cunha moved to Winnipeg to work as a Full-time Professor and Division Head (Endodontics) at the College of Dentistry, Faculty of Health Sciences at the University of Manitoba. Dr. Cunha became Fellow of the Royal College of Dentists of Canada (Endodontics) in 2013 and, in 2016, decided to work in Private Practice full-time. Dr. Cunha is the Co-founder of Prairie Endodontics in 2018. Dr. Cunha has been a guest speaker at more than 200 events worldwide. He has published more than 100 papers and abstracts in several peer reviewed journals. In addition, Dr. Cunha has published six book chapters and has extensive clinical experience obtained working in Private Practice limited to Endodontics since 1995. Dr. Rodrigo Cunha is the Past President of the Canadian Academy of Endodontics (CAE).

Speakers and Topics - Saturday, June 6

Challenge and Change in Newfoundland and Labrador Oral Health

Mr. Ed Hollett
1:00. - 4:00 p.m.

In a lively talk followed by a question and answer session, we'll explore the challenges facing oral health professionals across Canada and discuss the ways the Newfoundland and Labrador Dental Board is changing to support them.

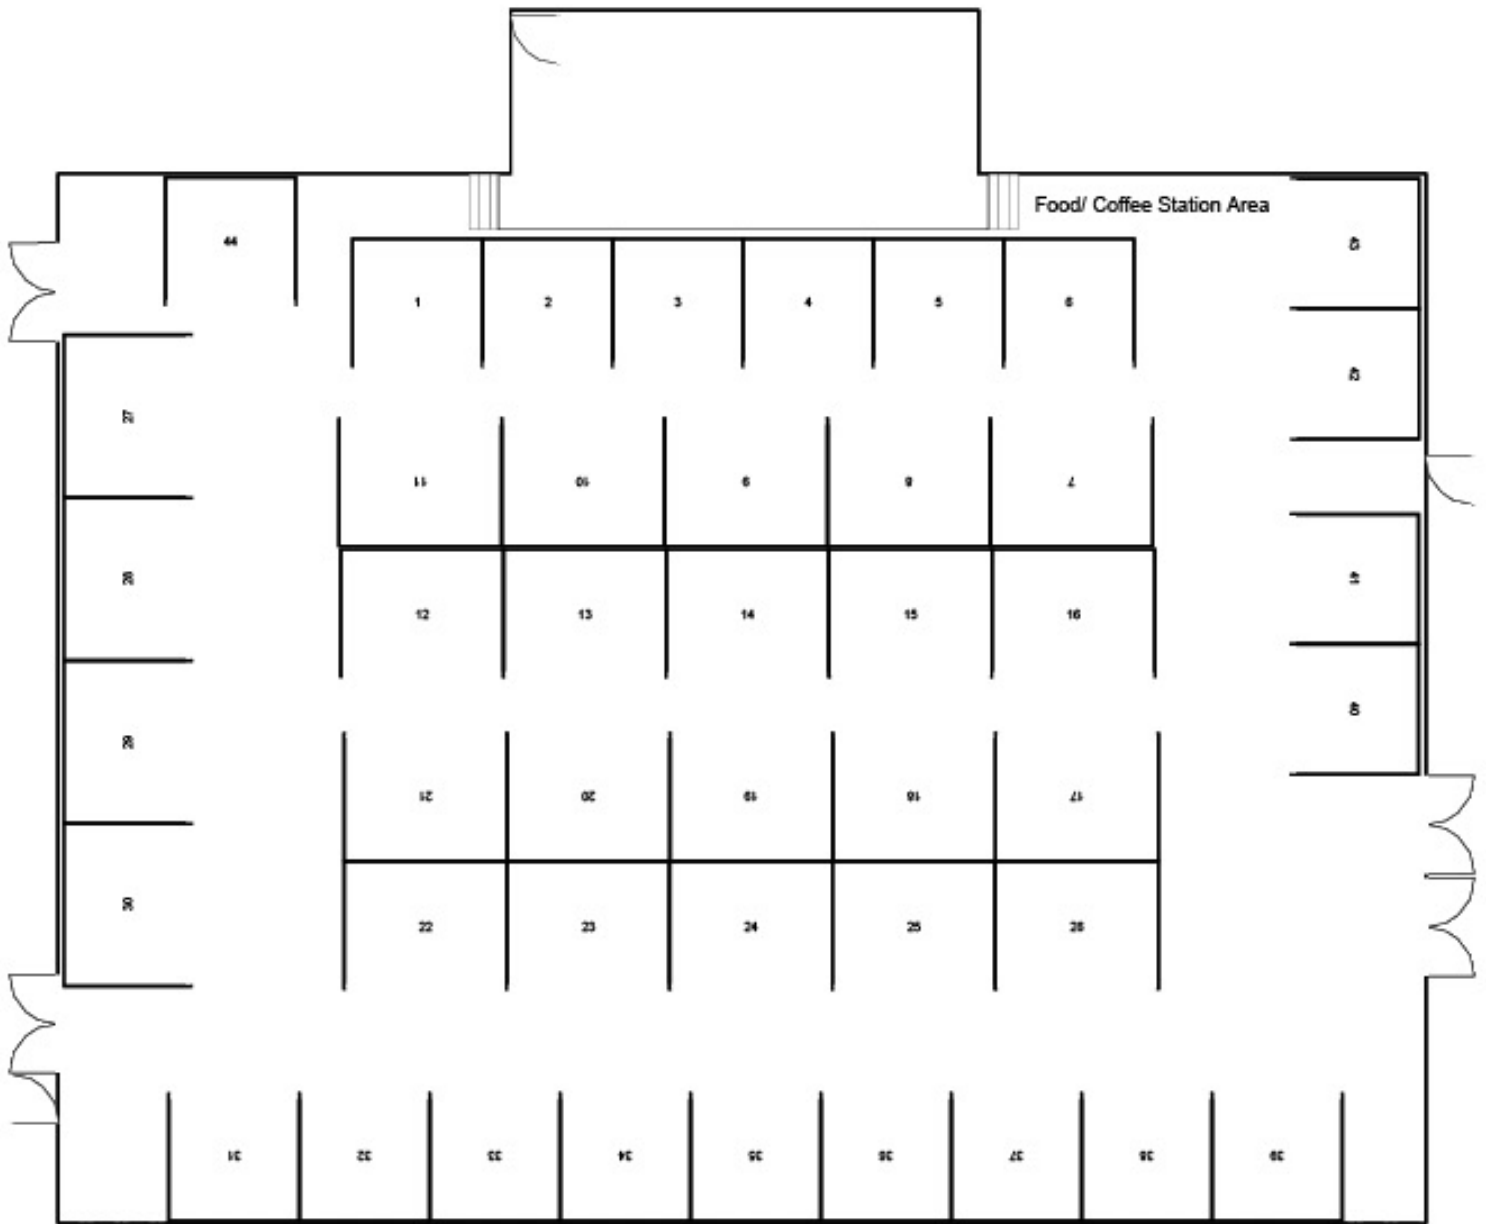

Edward Hollett is Registrar of the Newfoundland and Labrador Dental Board and Treasurer of the Canadian Dental Regulatory Authorities Federation.

The Newfoundland and Labrador Dental Board sets standards for dentists, dental assistants, and dental technicians so that the people of Newfoundland and Labrador can have every confidence in the oral health care.

Before his appointment as Registrar, Edward advised local, national, and international clients in health care, energy, defence, fisheries, agriculture, and manufacturing as a public policy and public relations consultant for 30 years. From 1989 to 1996, Edward served as special assistant to Premier Clyde Wells.

Edward studied political science, history and policy development at Memorial University and as a civilian graduate student at the Royal Military College of Canada, Kingston. His byline has appeared in local and national print media and academic journals and he is a frequent commentator on local and national public affairs.
